### Ecosystem Impact Project

You and a partner will work together to research a food web within your ecosystem. You will decide how the organisms should be placed within the trophic levels. You will research how humans are impacting that ecosystem and provide possible solutions to the problems caused by humans. You will have 3 days in the library to work on your project- any additional time is on your own!

Library Day	Expectations
1 (10/09)	Research (complete template)/ start finding images
2 (10/10)	More images/ start glogging!
3 (10/11)	Complete project/ finishing touches

Your project needs to include the following:

1	Title/ Ecosystem name	
2	Names/ class hour	
3	Trophic Level Pyramid: <ul style="list-style-type: none"> <li>• 2- 3 organisms at each level with pictures and names</li> </ul>	

4	Picture showing where ecosystem is located with <u>link containing more information</u>	
5	2 pictures showing 2 human impacts on the ecosystem with descriptions <ul style="list-style-type: none"> <li>• <u>one link giving further details</u></li> </ul>	
6	Picture showing a solution	
7	Text describing 2 possible solutions	
8	Link to a video clip related to the human impact/solution	

- Neatness/Creativity/Presentation count!!!!
