One of the main key concepts of Period 2 is the codifications of religions. Three of these were Christianity, Buddhism, and Judaism. Even though these religions were different, they shared similar patterns in that they all had belief systems, obeyed laws in their faith, worshipped, and had symbols to represent their faith.

Your job to research these faiths and learn how they BOWSSed (Belief, Obey, Worship, Spread, Symbol). Then you will create a Storyboard That project to reflect your findings.

Each student will research the following religions and create a 15-frame Storyboard That chart:
- Christianity
- Buddhism
- Judaism

There are five frames for each of the three religions:
- Beliefs
- Obey
- Worship
- Spread
- Symbols

Each frame must include:
- A visual using the Storyboard That tools: character, settings, images, props
- A brief description/summary, written in your own words
- Excellent grammar and spelling

Important:
- Use the FC Library research databases and your textbook for your research – no random Googling!
- You can work on this outside of class and school – it is a web-based program
- Don’t lose your SBT username and password! You need it to access your project.

Schedule: FC Library Lab on September 14-18, Thursday, Friday and Monday.

Due Date: Tuesday, September 19th

At the end of this project you should be able have an AP-quality discussion and/or write an AP-quality comparison essay about these three religions.

Chapter 4 Quiz is Tuesday, September 19th
